SUBJECT: The scope of duties of the Engineering staff attached to the Muzrai Department.

The following appears to be the spheres of work in which the Engineering staff may with advantage be engaged and it is believed that the field will supply ample work to keep the establishment fully engaged;--

1. The staff should make a detailed inspection once in 2 or 3 years of the buildings and surroundings of all Major Muzrai Institutions under the management of Government.

2. Prepare systematically comprehensive estimates for the repairs and improvement of the more important of these Major institutions, e.g. the temples at Nanjangud, Melkote, Chamarajanagar etc. These estimates and plans will be lodged in the office and the work taken up as funds permit after consultation with the local officers.

3. Prepare urgent estimates in connection with all buildings of Muzrai Institutions when specially directed to do so by the Muzrai Superintendent.

4. Scrutinise estimates received for sanction in the Secretariat from Deputy Commissioners of Districts, which are either not prepared or scrutinized by the District D.P.W.officers.

5. Prepare easy vernacular bulletins for the maintenance of buildings etc, eradication of plants, stoppage of leakages etc. for guidance of all managers of Muzrai Institutions.

6 The above work will have to be undertaken according to a comprehensive programme previously approved by the Muzrai Superintendent who will see that periods of tour for purposes of inspection and study are followed by periods of stay at Head Quarters for working up thoroughly the information collected during the tours.

e work for which estabt was not sanctd

"This work was the preparation of estimates for the repairs of certain important Muzrai Institutions detailed in the statement contained in File No.223 of 1918. It was expected that this work would be completed in about a year. Now that over a year has elapsed since the establishment was sanctioned, I should like to know if this work has been completed, if not what progress has so far been made with it. A statement showing the estimates prepared till now and those which still remain to be prepared, should be obtained from the Assistant -- Engineer and submitted for my perusal.

It may also be ascertained if the Assistant Engineer is submitting any monthly or periodical diary of his work. If so they may be obtained and submitted for perusal.

Memo No. 1278 dated Bangalore, 25th October 1919.

Forwarded to the Assistant Engineer, Muzrai Department for submission of the information called for by the Member of Council.

N O T E.

Referring to the Memo No.1278 dated 25th October 1919 asking what progress of work was done in the Engineering section of the Muzrai Department etc. I beg to state as follows:--

I entered upon my duties in the Muzrai Department on the 26th July 1918 and was asked to inspect a large number of Muzrai institutions and submit forecast estimates with reports for their repairs and such of the improvements as were ordered by the Muzrai Superintendent. The lists of institutions to be so dealt with were given to me by the Muzrai Superintendent from time to time with clear instructions about the requirements necessary for the several institutions.

The work took me on to the end of January 1919. During the month of

February I was mostly attending to office work and disposing of a number of estimates received in the Secretariat for sanction. It is in this month that detailed plans and estimates for reconstructing the Sri Vyasarayaswami Matha at Sosale took a final shape, the amount of the estimate being Rs.44,067/-

During the month of March 1919 I was asked to inspect the following institutions and prepare ~~the~~ detailed estimates for their repairs and improvements:--

1. Mr.P.Krishna Rao's Chattram at French Rocks.
2. Sri Prasanna Nanjundeswara Swami temple at Mysore.
3. Construction of a bridge across Seetha Kalve in the river Cauver and approach way to the Dhanushkoti at Chunchankatte, Yedatore
4. Sri Rama Devaru temple at Chunchin katte, Yedatore Taluk.
5. Sri Arkeswaraswami temple at Yeda

During the month of April 1919 detailed measurements for getting up and estimates for all the Muzrai institutions at Melkote in the Mysore Dis were taken, and most of the plans hav

been completed with detailed estimates. An estimate for Masjid-i-Ala at Seringapatam was also prepared and submitted in this month, along with the disposal of a number of estimates received in the Secretariat for sanction.

In the month of May the Muzrai institutions at Kalasa in the Mudgere Taluk and at Khandya in the Chickamagalur Taluk of the Kadur District were inspected and measurements and notes for their repairs and improvements taken. The usual office work of scrutinizing the estimates received for sanction in the Secretariat was also attended to.

In the month of June 1919 the estimates and plans for the construction of a birdge and an approach way to Dhanushkoti at Chunchinkatte and those for the institutions at Kalasa and Khandya took a final form. In this month detailed plans and estimates were

submitted for the construction of an anicut and channal across the ~~Sathyar~~ Thuraiyilar river at Valavatti in the Tiruvannamalai Taluk in the Madras Presidency belonging to the Sri Vyasarayaswami Matha.

In the month of July 1919 estimates for repairing the Sree Saradamba temple and Matha buildings at Sivaganga, as also those of Sree Narasimhaswami temple at Hathyal in the Tiptur Taluk, were under preparation. The inspection of Jeggulala Dharmasala at Mysore and the submission of revised estimates and plans for the construction of car wheels of Sree Rameswaraswami temple at [illegible] Thirthalli as also for the extension of Agumbi Annachattram in the Shimoga Dt were completed.

In the month of August 1919 -- the estimates for the repairs ~~of~~ and improvements to the Sree Narasimhaswami

temple at Hathyal, Tumkur District, and those for the Sree Saradamba temple and Matha -- buildings at Sivaganga Bangalore Dt took a final shape. The scrutinizing of an estimate for the repairs of Sree Mallikarjuna-swami temple at Mrugavadhe in the Thirthall taluk amounting to Rs. 12,099/- was done, along with other smaller estimates received for sanction.

In the month of September 1919 the estimates and plans for repairing the Sree Yoganarasimhaswami temple at Saligrama Yedatore Tk and those for the house attached to the Jaggulala Dharmasala at -- Mysore and the Dharmasala itself were completed.

Modified estimates for sinking 3 wells at Kyamenahalli Koratagere Sub Tk were prepared and submitted, and the usual work of scrutinizing the estimates in the office was attended to.

In the month of October 1919 detailed estimates for repairing the Sree Narayanaswami and Yoganarasimhaswami --

temples at Melkote and those of Sree Arkeswaraswami and Sree Ramadevaru temples in Yedatore Taluk were prepared and submitted.

Plans of some of the institutions at Nanjangud were also done.

In this connection I may be permitted to mention that a complete diary of work done by me ever since I entered this Department has been maintained and is -- herein enclosed. On one side of this book the work done monthwar has been entered and on the other side a list of detailed estimates and plans prepared is noted.

The work shown in the statement enclosed in the file No. 223 of 1918 was not taken up regularly as more urgent work, ordered from time to time by the Muzrai Superintendent, had to be attended to. I have been working with the help of one Sub Overseer and a clerk. The services, till now, of a draughtsman have not been given [redacted]*. The Sub-overseer too was reverted to P.W.D. on 24-9-1919.

Every month a studied programme of inspection work was being approved and passed by the Muzrai Superintendent and the work done is in accordance with those programmes.

Out of the statement referred to in the file noted above, the work of nearly a dozen of the most important institutions has been completed. (Vide Statement A) The list in the diary book shows that a large number of institutions not noted in the statement referred to have been dealt with as per orders of the Muzrai Superintendent.(Vide Statement B.) Under the general orders of the Muzrai Secretary such of the estimates as were received in the Secretariate for sanction and have not been prepared by Professional agency used to be sent to me for scrutiny and check. Statement C shows that the estimates that were thus handled.

Submitted to the Muzrai Secretary thro' the Muzrai Superintendent in Mysore.

Bangalore
1st November 19.

Assistant Engineer
Muzrai Department.

Statement A.

List of institutions included in the statement enclosed in File No 223 of 1918,, and have also been dealt with by the Assistant Engineer.

Name of the institutions.

1. Sree Vaideswara swami temple } At Talkad, T.Narasipur Taluk
2. " Keertinarayanaswami temple }

Joint inspection with the Archetectural Exexcutive Engineer Has been done . The Executive Engineer's report which has been forwarded through the Superintending Engineer is awaited. After its receipt further action will be taken.

3. Sree Sreekanteswaraswami temple at Nanjangud.
4. Kuncigar Chattram at Nanjangud

Plans of Sreecanta Mandiram, Sreecanta Mantapa and of Chattram are ready. Repair estimate for the main building is under preparation. Plan of of the main temple has to be taken. This work has taken about 15 days.

5. Sree Ramadevarum temple at Chunchankatte Yadatore taluk
6. Construction of a bridge and an approach way to Dhunushkoti at Chunchankatte
7. Sree Arkeswaraswami temple at Yadatore.

Detailed estimate for repairing No.5 has been submitted

Do with plan reports for No.6. has been submitted

Do for repairing the Sree Arkeswaraswami temple has also bee submitted.

This work took about 1 month.

8. Sree Narayanaswami temple at Melkote.
9. " Yoganarasimhaswami temple at Melkote, French-rocks Sub-taluk.

Detailed plans for both the temples and general plans of all the institutions at Melkote Viz:-

1. Bhuvaneswari Mantap.and others at Kalyani
2. Perialwar. Sannidhi

Statement A (Contd)

3. Laksminarasimhaswami temple.

4. Gopalakrishnaswami temple

5. Varahakshetra.

6. Seetharanya temple &c

And detailed estimates for

1. Sree Narayanaswami temple
2. Vahanamantapa
3. Seetharanya Temple
4. Dharamantapa

and 5. Sree Yoganarasimaswami temple

have been submitted. These works occupied about 2½ months.

10. Sree Anjaneyaswami temple at Kyamenahalli, Kortagere Sub-taluk.

Detailed estimate has been submitted. About a week was taken for this work.

Bangalore,
1st November 19.

Assistant Engineer,
Muzrai Department.

Statement B.

List of institutions dealt with by the Assistant Engineer which are not noted in the statement attached to the File No 223 of 1918.

1. Detailed estimate for repairing the Sree Chamarajendra Sanskrit College at Bangalore. Rs 8605.

2. Detailed plans and estimate for reconstructing the Sree Vyasaraya swami Matha buildings at Sosale, T.Narsipur Taluk. Rs 44,067.

3. Detailed plan and estimate for reconstructing the chattram at Channapatna Rs 3,624

4. Plan and estimate for building Utsavaru temple for the Sree Venkatramanaswami temple ate Hemagiri. Rs 2,400/-

5. Plan and estimate for repairing and improving the chattram at French-rocks built by Mr. P.Krishna Roa Rs 4,706

6. Detailed estimate for repairing the Sree Prasanna Nanjundeswara swami temple at Mysore. Rs 1,343

7. Detailed estimate for repairing the Jumma Masjid at Seringapatam Rs 2,785

8. Detailed estimate for repairing and improving the Sree Kalaseswaraswami temple at Kalasa, Mudigere Taluk. Rs 22,882

9. Plan and estimate for constructing an anicut at Valavatti in Tiruvannamalai Taluk and repairs to the channel belonging to the Sree Vyasarayaswami Matha. Rs 7,500

10. Detailed estimate for repairing the Sree Markandeswaraswami temple at Khandya, Chickmagalur Taluk Rs 2,747

11. Estimate for repairing the car wheel of Sree Rameswaraswami temple at Thirthalli with plan of the wheels Rs 1350

12. Estimate for constructing a bath and a store room for the Govt Annachattram at Agumbi, Thirthalli Taluk 1,824

13. Estimate for repairing the Kalyani and Bile Mantapa on the hills at Hathayal, Tiptur Taluk Rs 285

Statement B contd.

14. Detailed estimate for repairing the old and new matha buildings at Sivaganga Nelamangala Taluk Rs 1,914

15. Detailed estimate for repairing the Sree Saradamba temple at Sivaganga, Nelamangala Taluk. Rs 938

16. Detailed estimate for deepening the well near the new Matha building at Sivaganga, Nelamangala Taluk Rs 281

17. Modified estimates for sinking 3 wells at Kyamenahalli Koratagere sub-Taluk Rs 2816

18. Plan and estimate for reconstructing the house attached to Jeggu-Lala Dharmasala at Mysore. Rs 7,000.

19. Repairing estimate for repairing the Jeggulala Dharmasala building at Mysore Rs 983

20. Revised estimate for repairing the Sree Yoga Narasimhaswami temple at Saligram, Yedatore Taluk. Rs 2098.

~~21.~~

Bangalore
1st November19.

C. Vasudeva Rao
Assistant Engineer
Mysore Department

The Scope and duties of the Engineering Staff

Many of the estimates for repairs and improvements of the Municipal institutions are generally got up by Sanitary inspectors and tank inspectors etc

As their knowledge of the Engineering profession is very poor They cannot be expected to handle the question of repairs in a satisfactory manner.

1) In some cases the improvements proposed will be quite incongruous and will not match with the existing architecture of the institution.

2) In some other cases ~~necessary~~ Provision for all the necessary items of work will not be made, with the result

vide Remarks passed by the Executive Member of Council now 1st member on the Municipal file No. 1 of 1916.

That one portion of the work done will have been either completely lost- or damaged before another portion is completed.

e.g. The parapet wall constructed for the Kalyani on the Hatigarha hills was washed out immediately it was constructed.

High level water flow- ing from the hills had to be diverted before the parapet was started

Under similar conditions the work done in one place will be quite different from that in another place.

More uniform and satisfactory work can be done by having some professional check in the office Sanctioning the estimates

Under cover of doing
some Seva the devotees
Construct additional ~~buildg~~
buildings in the form of
mantaps, Kitchens & c -
In some cases e.g. in the
case Veerabhadra Swami
Temple at Sosale D. Manju
ng the Kitchen has only
got a foundation and
some basement ~~Coorse~~
~~so~~ with a lot of rubbish
stacked there giving
room for the luxuriant
growth of Lantana &
other Scrub vegitation
In other cases there are
mantaps ~~which~~ which
~~are so called~~ of look
to be apparently complete
but still requiring
Considerable work
before it can be called
Complete The Key amma
in the Karatapure Sub Pg 11
-nalli round the Sree
Anjaneya Swamy Temple

the walls and not even
concrete on the roofing
slabs. Such sevas are
better not to be permitted
to be done than leave
them in their present condition
When quoting these instances
I am not speaking of
the design much less
of the propriety of the
site selected for such
constructions Any
improvement or addition
will have to be carefully
studied along with the
main institution and
its surroundings from
the point of view of
an artist without some
sort of check on such
constructions in the
Head office no proper
scrutiny can be exercised
These half finished

Constructions become a burden to Govt who have to incur some expenditure either to Complete them or to demolish them Incl. ~~Lastly~~ Not to speak of ~~the~~ their proper maintenance.

This is one of the main causes why a consolidated plan of all the major Municipal institutions will be necessary showing the improvements to be required.

Some of the Estimates for work sanctioned years and years back have not been closed till now and fresh estimates are received for works partly completed

The improvement of the
Kathyala temple sanctioned
in the year 1910 are good
examples of both the
Statements made above

With the help of
Engineering establish-
-ment it is possible to
exercise some Control
over such works that
are being delayed.

Sanctions of the General
Murrai Fund wants.
a regular expenditure
of Rs 20,000 per annum
on the improvements
of the several Murrai
irrigation sources in the
State. The above amount
being met in moieties
both from the State funds
and the Murrai Funds.
By maintaining a series
of registers and watching
the progress secured
on many of the Murrai sources

for which estimates have been sanctioned and by ~~visiting the~~ periodically visiting other institutions requiring repairs a continuous scheme of maintenance can be worked out. Within a short period of 4 or 5 years as nearly half the institutions in the State both big & small will have received some attention and monuments of ancient architecture will have an enhanced life.
